

--In one aspect, there is provided a carrier comprising at least one further join forming at least one further pocket or pouch for containment of medicament.--

Please replace the paragraph beginning at page 5, line 9, with the following paragraph:

-- Preferably the medicament is in dry powder, tablet, liquid, paste, cream or capsular form. More preferably the medicament is selected from the group consisting of albuterol, salmeterol, ipratropium bromide, fluticasone propionate and beclomethasone dipropionate and salts or solvates thereof and any mixtures thereof.--

Please replace the paragraph beginning at page 5, line 21, with the following paragraph:

--According to a further aspect of the present invention, there is provided a method of making a carrier comprising forming a fold between a first portion and second portion of an elongate strip such that the first portion contacts the second portion; forming a join between the first portion and the second portion wherein the join and the fold form the edges of an open pocket or pouch for containment of medicament; filling the open pocket or pouch with the unit dose of medicament; and closing the open pocket or pouch by forming a further join.--

Please delete from the paragraph beginning at page 6, line 19, through and including the paragraph beginning page 9, line 16.

In the Claims:

1. (Amended) A carrier comprising an elongate strip having a first portion and a second portion; a fold between said first portion and said second portion such that the first portion contacts the second portion; and a join between the first portion and the second portion, wherein said join and the fold form the edges of a pocket or pouch for containment of medicament, said pocket or pouch containing a unit dose of medicament therein.
